The ritual offers techniques which vary in tempo of acupressure, rolling motions, long strokes and percussion, providing an invigorating and energising experience for the body. Choose to enjoy this massage with or without using oil.

**MALAY**  
The art of traditional Malay massage is passed on from generations. The technique consists of long kneading strokes that focus on the muscles and pressure applied to various points on the body. This treatment uses *lengis nyuh* (coconut oil), a powerful anti-oxidant which protects, heals and softens the skin.

**MELIMPUN (PREGNANCY MASSAGE)**  
A traditional Balinese pre-natal massage tailored to meet the changing bodies of pregnant women. Trained therapists apply gentle strokes combined with coconut oil to relax tense muscles, ease sore spots, improve blood circulation and mobility for an overall feel good experience.

**MEPIJIT POINT (THREE POINT MASSAGE)**  
This deeply cleansing massage is a synergistic ritual on three areas of the body integral to the detoxification process. Inspired by the movements of Indian head massage, the head is massaged to release tension and reignite neural pathways. Traditional Balinese strokes assist the natural cleansing processes of the intestines whilst stimulation of reflex zones on the feet unifies the total body experience. The varying tempos of acupressure used provide an invigorating and energising experience for the whole body.

**FOOT MASSAGE**  
The theory of reflexology lies in the understanding that feet have reflex points which correspond to internal organs and limbs to balance all functions of the body. By stimulating these points, circulation of the entire body is improved.
